1. The 9-15-03 amendment and papers are made of record.
2. There appears to be no written description of figure 5 and the numerals therein. The different depth recesses of claim 1 are not seen nor described. Similarly, the claim 19 coupling member being seventeen per cent of the length of the heat dissipating device does not appear to have been discussed or shown in the original description or claims.

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claims 1-4,6-13,15,16,18-21 and 23-26 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. See paragraph 2 above. Beware of new matter. Parts in the original written description and drawings should be pointed out to argue the appropriateness of this rejection. These claims are not rejected on art at this time.

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

6. Claims 31-33 are rejected under 35 U.S.C. 102(e) as being anticipated by Lofland.

This reference was earlier discussed in previous actions. Board 12 with components on both sides is seen in figures 7 and 8, as well as bottom device 26 and top device 24, with coupling portion 42/44. Copper is given as the material and a computer environment is disclosed for a processor. All else is clearly seen.
